

AUTOMATIXX

DELIVERING EXPERIENCE

About Us:

As a Technology House , we specialize in creating cutting-edge, cost-effective, and environmentally-friendly solutions and services spanning a diverse portfolio. Our expertise includes Integrated approach to Building Automation and Management, Digital Electronic Security and Access Control, IP Surveillance, MEP, HVAC, Smart Restroom, Home Automation, Fire Fighting & Fire Alarm System etc. along with complete after sales service support through Annual Maintenance Contracts. catering to both B2B and B2C markets.

AUTOMATIXX TECHNOLOGIES specializes in Design, Supply, Install, Service, Upgrade & Maintenance, marketing and consulting for Integrated Building Management Solutions, leveraging extensive expertise to create value for users, installers, and end customers. We tailor comprehensive solution to meet specific customer needs.

Our commitment lies in delivering services and solutions that empower businesses to achieve their goals and thrive in the dynamic realms of Energy Efficiency, Automation, Security, Safety and Digital landscape Ensuring optimal Building Performance and cost effective ownership through tailored Services. With a skilled team of technology, design, and digital strategy experts, we stand ready to assist businesses of all sizes and industries in turning their concepts into tangible realities.

Our Services

**Building
Automation**

Fire & Safety

**Elec. Security &
Surveillance**

**HVAC Control
Products**

Cloud Solutions

**Annual
Maintenance**

OUR VISION

- ❑ To delve deep, Unlock Insights, and act **BOLDLY** .
- ❑ Empower businesses and communities with intelligent solution and On - Time services.
- ❑ Design solutions those adapt to evolving needs, reduced downtime, promote energy efficiency.
- ❑ Create environments that inspired productivity, Wellbeing and **CUSTOMER SATISFACTION**

OUR MISSION

- 
- ❑ Our Mission is to Build a long-term relationship with our internal and external stakeholders.
 - ❑ Lead the way in transforming the built environment into intelligent, responsive and sustainable spaces.
 - ❑ Customize and deliver each project to meet our customers' unique needs and budgets. By leveraging **INNOVATION** and seamlessly integrating advanced technologies to enhance the efficiency, **comfort**, and security of buildings.

Building Automation

Building Management Systems (BMS) are essential for addressing the complex challenges of modern building operations. They optimize energy efficiency, reduce operational costs, and enhance comfort by precisely controlling HVAC, lighting, and ventilation systems.

As a technology and Solution Expert AUTOMATIXX TECHNOLOGIES can support in consultation, Custom design, Engineering, Professional Installation, Integration, Testing, Training and Support for Standalone, integrated or centralized platform that automate and optimize the operation of building systems to improve energy efficiency, Operational Efficiency, enhance occupant comfort, Cost saving, compliance and Sustainability.

Cloud Solutions

In today's dynamic world, the challenges of managing vast amounts of data, ensuring scalability, maintaining security, interconnected devices, optimizing operations, and gathering real-time data drive the need for cloud-based & IOT solutions. These solutions offer flexibility, cost-efficiency, and robust security measures, addressing the complexities of data storage, access, seamless connectivity, enhanced automation, and actionable insights in an increasingly digital and distributed environment.

Home Automation

Smart Restroom

AUTOMATIXX TECHNOLOGIES can help by providing tailored solutions that enhance connectivity, streamline operations, and secure data through innovative technology. Their expertise in integrating advanced systems ensures improved efficiency, real-time insights, and robust security for your enterprise's unique needs.

Annual Maintenance

The Need for Annual Maintenance Contracts arises from the challenges of managing complex systems, minimizing downtime, and ensuring consistent performance. These contracts provide regular upkeep, timely repairs, and proactive support, addressing issues before they escalate and ensuring smooth, uninterrupted operations.

CCTV System

AUTOMATIXX TECHNOLOGIES can help by offering comprehensive and Non-Comp. Annual Maintenance Contracts that ensure regular system upkeep, prompt repairs, and proactive support. Our tailored services enhance equipment reliability, minimize downtime, and provide peace of mind with predictable costs and expert care to ensure complete peace of mind 24*7.

Why Choose Us ?

At AUTOMATIXX TECHNOLOGIES we are dedicated to guiding you in making the most informed and strategic decision for your project's inception. Our approach is designed to align closely with your vision and goals, ensuring that every step of the project is shaped according to your expectations.

Here's how we achieve this:

Quality & Reliability

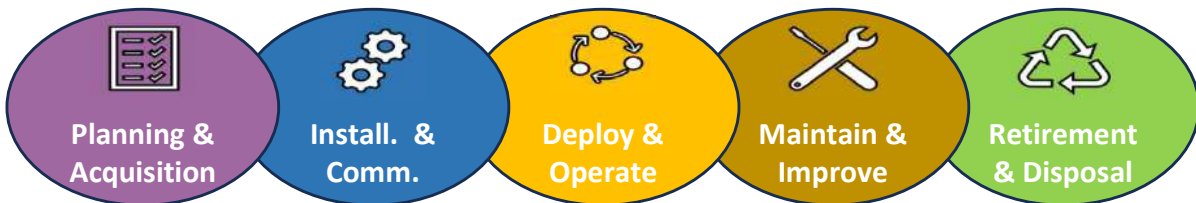

After Sales Support

Comp. Range of solutions & Services

Cost Competitiveness

Customer Centric Approach

25 + Years of Man days Experience

Asset Life Cycle Management

OEM Support
